

# THE THERMOVEYOR

## THE HEATED OR CHILLED MOBILE SCREW CONVEYOR SYSTEM FOR FOOD PROCESSORS

### Proven to Increase Productivity and Quality in Food Processing Plants

*It's Thermal* - it heats or chills, heating cheese for easier conveying, or chilling fruits, etc.

*It's Mobile* - built on a stainless steel frame with heavy duty castors for easy moving.

*It Tilts* - to adapt to your equipment already in place.

*It Mixes* - food in screw conveyor can mix as it's moving, chilling, or heating.

*It's Easy Wash* – no tool dismantling, all 304 grade stainless steel, and food grade finish.

*It's Customizable* - for unique needs, our experienced design engineers will customize our design to your application.

*It's Economical* - We ARE the factory, no middle man to deal with. Our conveyors are all designed and built at our site by our highly skilled craftsmen using modern CNC fabrication equipment and welders. This is a fully designed working solution, yet can be customized to fit your exact needs.

### Gain the benefits for your plant that this food processing screw conveyor provides.

Food processors are installing these units to gain efficiency and lowering production cost. Move product faster, eliminate or reduce food spillage, faster clean-up, customized chutes, and chill or heat product.

Because of these efficiency gains, more and more food processors are coming to us for thermal screw conveyor systems. All units for food processing are made of stainless steel, most often 304 stainless, and finished to a 2B food grade finish. [Contact us](#) to learn more.
